Sep 2021 - Jun 2025

- B.Tech Electronics and Communication Engineering
- CGPA – 8.98 Sep 2021 - Jun 2025

## INTERNSHIP

### Intern,Full Stack Web Development

Intrnforte | Oct 2025 - Jan 2025

- Collaborating on projects including an e-commerce product listing platform, enhancing user experience through responsive design and functionality.
- Contributing to the development of an open-source job portal, focusing on back-end integration with Django and front-end implementation using React.js.
- Utilizing Git and GitHub for version control, ensuring effective collaboration with team members and streamlined project management.
- Engaging in database design and management using MySQL to support data-driven features and optimize performance.

## PROJECTS

- Developed a simple webpage using HTML and CSS to showcase a selection of perfumes with images and descriptions.
- Designed a basic to-do list application that allows users to add and remove tasks, focusing on a clean and intuitive interface.
- Built an interactive web game using HTML, CSS, and basic JavaScript, allowing users to guess a randomly generated number.
- Created a static brochure website using HTML and CSS to promote upcoming photo gallery events, featuring event details, dates, and engaging visuals.
- Developed a static course registration page with HTML and CSS, including input fields for user data and course selection.
